ALBERTA BICYCLE ASSOCIATION – PROVINCIAL REGULATIONS

Free-Lap Rule

2.7.2 Riders will normally cover the prescribed distance of the race regardless of mishaps and must make up any distance lost on their own ability unless a free lap is granted for a recognized mishap. One free lap may be granted for each recognized mishap, however, on courses shorter than 1 km two free laps may be allowed for a given mishap. The following rules apply to free laps:

- a) A rider must report to the official service pit and have his or her mishap verified by a commissaire;
- b) Riders may return to the service pit in the most economical fashion possible, with the exception of riding the course in the direction opposite that of the race. (Penalty –disqualification);
- c) A “recognized mishap” is defined as the breakage of an essential piece of the bicycle, or a crash;
- d) A rider who is granted a free lap must return to the race in the position held at the time of the mishap. A rider who was in a group shall return at the rear of the same group. A rider returning to the race after a free lap shall be ineligible for sprint prizes for one lap thereafter.
- e) Free laps will not be awarded in the final 5 laps of a Criterium. Furthermore, a rider granted a free lap must re-enter the race before the final 3 laps; after that point any rider in the pit is losing ground on the field. The Chief Commissaire may adjust the number of laps at which free laps cease to be awarded, and the number of laps at which a rider must re-enter the race, according to the length of the circuit.

Riders falling behind the field

2.7.3 Riders who have lost contact with the field, and are then caught by a breakaway from the field, may not lead. Riders off the front of the field may not accept assistance from riders who have lost contact with the back of the field. (*Penalty –disqualification*)

Lapped riders may rejoin and race with the field in cases where lapped riders are not being pulled.

Finish on Same Lap

2.7.4 All riders will finish on the same lap, regardless of the number of laps completed.

ALBERTA BICYCLE ASSOCIATION – PROVINCIAL REGULATIONS

Criterion – Points Race

2.7.5 Criteriums may be raced in a Points Race format, in which case the following rules will apply:

- a) Final placing in the race will be determined, in order of priority, by:
 - 1) Number of laps completed;
 - 2) Greatest number of points earned;
 - 3) Placing in the final sprint

- b) Points will be awarded at intermediate sprints, held every fourth lap, in addition to the final sprint, to the first four riders to cross the finishing line:

1st place	5 points	2nd place	3 points
3rd place	2 points	4th place	1 point

Alternatively, points may be awarded in the final sprint to eighth position, as follows: 10, 8, 6, 5, 4, 3, 2, and 1.

- c) A rider, or group of riders, will be considered to have gained a lap when such rider(s) make contact with the tail-end of the field, generally defined as the largest group on the road at any given time.
- d) All riders, including those who have either gained a lap or lost a lap, are eligible to earn points.
- e) Riders lapped more than once will be pulled from the race and classified as DNF.

Criterion – Standard Race

2.7.6 The following rule will apply at Standard Criteriums

Lapped riders: Lapped riders may, at the discretion of the Chief Commissaire, be pulled from the race. Riders who are lapped and pulled will be placed according to distance covered and placing amongst those pulled on the same lap.

ALBERTA BICYCLE ASSOCIATION – PROVINCIAL REGULATIONS

Criterion – Stage Race

2.7.7 Time adjustments in criterium stages shall be computed as follows, except that further adjustments may be made at the discretion of the Chief Commissaire in unusual circumstances.

- a) In a criterium stage where riders who are about to be lapped are required to withdraw, they should be assigned estimated finish times assuming that they would have continued to lose laps at the same rate. The following formula may be used to compute the estimated finish time:

$A = W + W / (L - R)$, where:

A = adjusted “time at” of the withdrawn rider relative to the race winner

W = finish time of the winner of the race

L = total number of laps in race\

R = number of laps to go in the race at the time the rider was about to be lapped

- b) In a criterium stage where lapped riders are permitted to finish, they should be assigned a time penalty that is the rider's average lap time multiplied by the number of laps the rider is down at the finish. This adjusted time may be computed as follows:

$A = F \times L / (L - D)$, where:

A = adjusted finish time of the lapped rider

F = actual finish time of the lapped rider

L = total number of laps in race

D = number of laps this rider was behind the leaders at the finish
