

# COVID-19 RETURN TO PLAY PROTOCOL

Updated Feb 2021

## INTRODUCTION

This document outlines specific protocols clubs must follow in order to resume activities during the COVID-19 pandemic.

Below there are specific protocols for each of the cycling sports as well as general regulations which are appropriate for every sport.

**None of these regulations supersede local regulations.** All clubs must have the appropriate permissions to use city property when applicable. When running any club activities all municipal regulations must be adhered to.

AHS has put out specific guidelines for outdoor recreation which can be found at <https://www.alberta.ca/assets/documents/covid-19-information-guidance-for-winter-recreation.pdf> Please keep updated on these guidelines. If AHS decrease's the maximum number of people gathered for any reason, all cycling activities MUST adhere to the new maximum.

AHS also has indoor event guidelines which can be found at <https://www.alberta.ca/assets/documents/covid-19-relaunch-guidance-indoor-recreation-entertainment-play-centres.pdf>

It is important to note that social distancing is required for ALL activities at ALL times. This means before, during and after the activity. **Failure to follow this guidance will result in your sanction being revoked.**

*At this time, activities should be restricted to local opportunities. It is not recommended participants seek sport, physical activity and recreation opportunities out of province.*

We realize that things are changing rapidly, and we will endeavour to update this document to ensure we are staying current with AHS and Alberta Government guidelines.

Please remember that all Alberta Bicycle risk management regulations are still in place, anything outlined in this document is above and beyond what we have posted on our website. This includes following all local and provincial laws.

## **KEY DEFINITIONS**

**ALBERTA HEALTH SERVICES**-Alberta Health Services (AHS) is the agency responsible for delivering health services to the people living in Alberta.

**ALBERTA BICYCLE ASSOCIATION**- The Alberta Bicycle Association (ABA) is the affiliated Provincial Sport Organization (PSO) of [Cycling Canada](#). It operates under the authority of the world governing body of all cycling's many sports, the Union Cycliste International ([International Cycling Union](#)) in Geneva.

**SANCTION**- A sanctioned event is defined as an organized group ride which is documented and approved prior to the date of the event and on file with the respective insured Provincial Territorial Association. Lists of individual members participating in the ride must be on file with the insured.

Events organized and conducted by an individual member does not automatically constitute a sanctioned event. An executive of a member club or an executive of the governing body will be required to provide sanctioning approval prior to the event taking place.

Failure to obtain sanctioning approval or failure to document the sanctioned event may result in a breach of coverage.

**RIDE LEADER**- A ride leader is the person designated by the club to be responsible for the group during any training activity. The ride leader shares information with the group, ensures all laws and regulations are being followed and is responsible for ensuring everyone's safety.

**CLUB LEADER**- A club leader is someone who acts and speaks on behalf of the club. Usually this would be members of the club's board of directors but can also be someone in other key roles.

~~**COHORT**—group of 50 people participating in a race/competition where social distancing cannot be maintained. A person is only able to have 1 cohort for stage 2. This means a person cannot participate in 2 different clubs' activities with 2 different sets of cohorts. It also means a person cannot participate in 2 sports with 2 different cohorts.~~

# **ALL CYCLING ACTIVITIES**

## COMMUNICATION

Club leaders and ride leaders are responsible for ensuring all participants have a clear understanding of the requirements for resuming any activity. Everyone needs to be educated on the risks involved and what is being done to mitigate those risks. Do not overestimate anyone's understanding of the risk involved, social distancing rules or proper sanitation. Volunteer leaders should be familiar with the information available from [AHS](#).

It is the responsibility of ride leaders/lead volunteers prior to the event to:

- Understand how to recognize the symptoms of COVID-19
- Collect all information (membership, registration waivers) prior to the event in electronic form, no paper copies.
- **COVID-19 assumption of risk waivers must be received by the club prior to allowing a participant in any race or activity**
- Ensure participants under the age of 18 have written consent from a parent/guardian. This can be emailed to the appropriate person before the event.
- Have an understanding of the symptoms of COVID-19 and have a screening process in place
- Remind everyone that anyone showing symptoms of COVID-19 must stay home
- Ride leaders/volunteers must remind everyone of the conditions for sanctioned group rides and any consequences for not following AHS and ABA regulations
- Remind participants that they should not be carpooling with anyone outside their immediate family
- Remind any participants who are at risk that they must stay home.
- If someone tests covid positive or checks yes to any AHS checklist questions and still shows to participate- please ask them to leave and call 811 to make sure you are following the correct protocols

## AT THE EVENT/ACTIVITY

Certain protocols must be in place during any sanctioned activity. It is up to the club, ride leaders and/or volunteers to make sure everyone understands the following:

- Maximum number of people gathering must be followed at all times and includes, participants, leaders, volunteers, parents, medical and spectators
- **All participants must complete the Alberta Health Safety Checklist before taking part. Most recent can be found at <https://open.alberta.ca/dataset/56c020ed-1782-4c6c-bfdd-5af36754471f/resource/9000840d-63c4-41b4-9ec1-db5c09b9051e/download/covid-19-information-alberta-health-daily-checklist-2020-12.pdf>**
- Riders must carry their own hand sanitizer
- No sharing of food/tools/water bottles

- If needed clubs should make parents aware that they may not congregate outside their vehicles while waiting (see max number of people)
- Any equipment that is shared/possibly touched must be sanitized between uses
- If mechanical assistance is required the person in need of assistance must move to a safe distance while being helped, any shared touch points must be sanitized before and after
- There must be specific protocols in place for dealing with any injuries or crashes which may occur; anyone providing aid must put on PPE before assisting the injured party, continuing to follow ABA risk management policy
- Sanitizer must be provided for any event where volunteers are required.
- Require all riders and volunteers to bring all food and fluids they will need for their session
- There should be no loitering before or after the activity.
- All activities must keep daily records of anyone attends for 15 minutes or longer, including volunteers. Records must be kept up-to-date and available to facilitate contact tracing in the event of an outbreak.

We understand that there may be situations where this cannot take place (passing on a trail) and we ask that you continue to make all participants aware of the risk and the potential that for a brief time that 2m may not be maintained when passing non-group participants.

## CLUB ACTIVITIES

### *FURTHER PROTOCOLS FOR TRAINING- XC/FAT BIKE*

Please be mindful of other people using the trail, especially those who may not have the skillset of the training group.

Consideration should also be given to the following:

- Including the ride leader, a group ride may consist of a maximum of 10 people
- No overtaking of slower riders unless there is a possibility to do so safely while maintaining social distancing
- Ride below the ability level of the riders, do not take risks
- Stagger the start of multiple group rides by 30mins to minimize overlap of participants finishing with those arriving to start their ride
- Request participants to arrive only 15 minutes ahead of their ride time to ensure a limited number of people are waiting to ride.
- The safest way to pass with social distance is to stay alert, slow down, and communicate with each other about how to proceed. One user or group must step six feet off-trail perpendicular to the trail to let the other user pass. Riders can leave their bike on the side of the trail. Walk back to the trail the same way to minimize any environmental impact. When you are identifying a spot to step off-trail, be cautious of sensitive or dangerous vegetation, insects, animals and loose or steep terrain.

- When taking breaks, be conscious to avoid group bunching, intersections, or spots on the trail where other users can't pass you safely.

#### ***FURTHER PROTOCOLS FOR TRAINING- BMX (INDOOR)***

The indoor track may choose to open but must follow the protocols listed below

- Open for training opportunities only, all activities must be overseen by a licensed coach
- Riders must maintain physical distancing at all times
- Indoor distancing is required to be 3 meters at all times
- Create a reservation system for training blocks, no walk ups allowed
- If you are allowing spectators communicate that there will be a limit and assign seating to provide social distance around each
- Parents are advised to drop off their athletes, if they must stay, they must remain 3 meters distanced from all other at all times. There are no gatherings between people of different households allowed at any time.
- Coaches must be masked at all times
- Riders must be masked when not actively cycling
- Coaches can come within the 3 meters to assist a rider if required (i.e. assist a fallen rider)
- Coaches must have a valid 2021 coaching license
